PROFESSIONAL SUMMARY

Innovative and results-driven Information Technology professional with experience in software development, web technologies, networking systems support, database management, and digital solutions development. Skilled in designing and implementing technology solutions that improve business operations and service delivery.

Experienced in developing management systems including inventory management solutions, hospital management systems, and other customized software applications. Passionate about solving real-world problems through technology, with strong abilities in programming, system analysis, UI/UX design, and technical support.

CORE COMPETENCIES

Technical Skills

- Web Development (HTML5, CSS3, JavaScript, PHP)
- Software Development and System Design
- Database Management (MySQL, SQL)
- Networking Systems Support
- UI/UX Design and Prototyping
- Data Analysis and Reporting
- Cyber Security Fundamentals
- IT Support and Troubleshooting

Tools & Technologies

- Visual Studio Code
- Git & GitHub
- Figma
- Adobe Creative Suite
- MySQL Workbench
- phpMyAdmin

- Bootstrap
- Chart.js

PROFESSIONAL EXPERIENCE

Senior IT Technician / Systems Developer

Electro Commission – Kayunga
January 2026 – Present

- Designed and implemented a Smart Inventory Management System to improve stock monitoring, tracking, and operational efficiency.
- Provided technical support, system maintenance, and troubleshooting services to ensure smooth IT operations.
- Developed digital solutions that improved service delivery and reduced manual processes.
- Worked with users to identify system requirements and provide effective technology solutions.
- Managed database structures, system updates, and application improvements.

IT Support & Web Development Projects

Independent Developer

- Developed responsive websites and web-based applications using modern web technologies.
- Designed and developed management systems including Hospital Management System, Pharmacy Inventory System, and Student Management System.
- Created user-friendly interfaces focused on usability and efficiency.
- Managed databases, application logic, and system documentation.
- Provided technical solutions through programming, networking, and software development.

SELECTED PORTFOLIO PROJECTS

Hospital Management System

Role: System Developer

Overview:

Developed an integrated hospital management platform that manages patients, appointments, medical records, billing, pharmacy, and hospital operations.

Technologies Used:

HTML, CSS, JavaScript, PHP, MySQL, Bootstrap

Impact:

Improved organization of healthcare records and simplified hospital administrative processes.

Smart Inventory Management System

Role: Lead Developer

Overview:

Designed a computerized inventory management solution for tracking stock levels, products, sales records, and inventory reports.

Technologies Used:

Database Systems, Web Technologies, Programming

Impact:

Improved inventory monitoring and reduced challenges associated with manual stock management.

Pharmacy Inventory Management System

Role: System Developer

Overview:

Developed a pharmacy management solution for managing medicines, suppliers, stock levels, pricing, and reports.

Technologies Used:

HTML, CSS, JavaScript, PHP, MySQL

Impact:

Enhanced medicine tracking and improved accuracy in pharmacy operations.

EDUCATION

Bachelor of Science in Information Technology

Limkokwing University of Creative Technology – Uganda Campus

Expected Completion: 2026

Relevant Areas:

- Software Development
- Database Management
- Networking
- Systems Analysis and Design
- Web Development
- Cyber Security Fundamentals

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Information Technology Training – Limkokwing University
- Web Development Training
- Database Management Training
- Cyber Security Fundamentals Training

TECHNICAL PROFICIENCY

Programming & Development

- HTML5
- CSS3
- JavaScript
- PHP
- Python
- Java
- C/C++

Databases

- MySQL
- SQL
- phpMyAdmin
- MySQL Workbench

Design & Development Tools

- Figma
- Adobe Photoshop
- Adobe Creative Suite
- Visual Studio Code
- GitHub

Other Skills

- Networking Configuration
- Computer Hardware Support
- System Administration
- Technical Documentation

AWARDS & RECOGNITION

- Bachelor of Information Technology Candidate – Limkokwing University of Creative Technology (2026)

PROFESSIONAL INTERESTS

- Software Engineering
- Web Application Development
- Cyber Security
- Networking Infrastructure
- Digital Transformation Solutions
